Dakota's **1st**

Cyberinfrastructure Conference

- Where Research, Education and Technology Meet •
March 3, 2011

Delivered virtually:

Faculty and students from NDUS campuses, tribal colleges and the North Dakota K-12 community are invited to participate.

The purpose of this conference is to enhance awareness of what cyberinfrastructure means to research, teaching and service in North Dakota.

Cyberinfrastructure:

The technology that enables distributed knowledge communities to collaborate and communicate across disciplines, distances and cultures.
